Alex Morgan

Platform Engineer

Lisbon, Portugal | alex.morgan@example.com
github.com/your-username | linkedin.com/in/your-profile

SUMMARY

Platform Engineer building self-service tooling on Kubernetes and AWS so product teams can ship without waiting on tickets. Fictional demo persona: replace with your own details.

EXPERIENCE

Platform Engineer, Acme Cloud
Lisbon, Portugal | Mar 2024 – Present

- Built a service catalogue that turns one YAML file into a deployed, monitored service, cutting new-service setup from days to under an hour.
- Run multi-environment EKS clusters with autoscaling, Helm-packaged platform components and zero-downtime upgrades.
- Moved every team to Argo CD and reusable GitHub Actions workflows, from pull request to production.
- Maintain Terraform modules for networking, IAM, databases and storage, reviewed through plan diffs.

DevOps Engineer, Globex
Porto, Portugal | Sep 2021 – Feb 2024

- Containerised a monolith into a dozen services, set up CI/CD and on-call dashboards, and wrote the team's runbooks.

Junior Software Engineer, Globex
Porto, Portugal | Sep 2019 – Aug 2021

- Backend services in Python and Go for the billing team.

EDUCATION

BSc Computer Science, Example University
Lisbon, Portugal | 2016 – 2019

SKILLS

Cloud (AWS): EKS, EC2, IAM, S3, RDS, CloudFront

Kubernetes and Platform: Kubernetes, Helm, Docker

Delivery and IaC: Argo CD, GitHub Actions, Terraform

Observability: Prometheus, Grafana, Loki, OpenTelemetry

Languages: Go, Python, Bash, TypeScript

LANGUAGES

English (Native), Portuguese (Fluent), Spanish (Conversational)
